

Systems Security Certified Practitioner SSCP

- Course Overview:

The Systems Security Certified Practitioner (SSCP) is the ideal certification for those with proven technical skills and practical, hands-on security knowledge in operational IT roles. It provides confirmation of a practitioner's ability to implement, monitor and administer IT infrastructure in accordance with information security policies and procedures that ensure data confidentiality, integrity and availability.

The broad spectrum of topics included in the SSCP Common Body of Knowledge (CBK) ensure its relevancy across all disciplines in the field of information security.

Duration: 5 Days

Exam: SSCP

- Target Audience:

This Systems Security Certified Practitioner training course is designed for those who possess technical IT capabilities and practical knowledge of IT security.

Individuals within the following job roles will also benefit from this SSCP certification:

- Network Security Engineers
- Systems Engineers
- Systems/Network Administrators
